

Shocking But True!

This is an actual METRO-produced flyer... paid for with your tax dollars.

Actual METRO Flyer

METRO is actually using taxpayer money to distribute a flyer about the dangers of rail, part of which is reproduced to the left.

METRO's Light Rail Plan...

- **Costs Too Much** – Well over \$8 billion and does not reduce congestion
- **Does Too Little** – Moves less than 1% of our traffic
- **Dangerous** – Light rail is the most dangerous form of transportation in a city. According to U.S. Department of Transportation data, light rail has almost 3-times the fatality rate of buses – 61 deaths in Los Angeles alone as of November 23, 2002

**The METRO Plan:
Costs Too Much, Does Too Little,
Far Too Dangerous**
